The following is an **Examiner's Statement of Reasons for Allowance**:

Claims 24-28, 30-38 are directed to isolated nucleic acid molecules (both cDNA and genomic) consisting of or comprising DNA sequences encoding a specific splice form of a human serine/threonine kinase identified by its specific amino acid sequence, vectors and host cells comprising said molecules and methods of expressing said molecules.

Claimed DNA sequences are free of prior art. Further the prior art does not teach or suggest preparing such specifically claimed DNA sequences. Hence said sequences are also non-obvious. Since claimed DNA sequences are both novel and non-obvious, nucleic acid molecules consisting of or comprising said sequences, vectors and host cells comprising said molecules and methods of expressing said molecules are also novel and non-obvious.

Claims 24-28, and 30-38 are allowed.
